

Set a deadline based on a duration

<https://documentation.dcr.design/example/set-a-deadline-based-on-a-duration/>

A deadline can be set based on data. You can enter a deadline as a duration and get a deadline for that specific date. The deadline expression

Duration

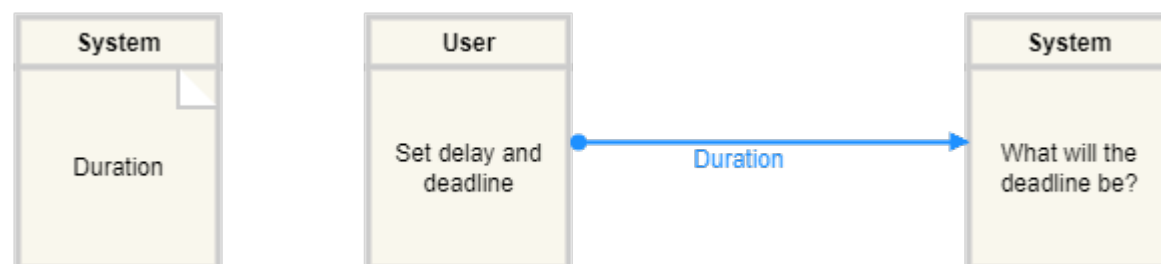

gives you the deadline.

When we simulate we can set the startdate to November 1st, 2019 and enter a duration of P7D, i.e. 7 days. When the user executed the Set deadline activity, the resulting deadline is November 8th, 2019.

Recommendation Next Step: No Recommendation Found Scenarios: <input type="text"/>	Tasks (3/3) Reset Filters + Filters Filters: <input checked="" type="checkbox"/> Group by roles <input type="checkbox"/> Render 3. Deadline is Nov 1st + 7 days + 1 day = Nov 9th
