Date: 09/07/2020

Description: DCR Open Case-manager & Highlighter tool was presented online at the International Conference on Software and Systems Process 2020, Sunday, June 28th. Professor, Thomas Hildebrandt presented the DCR Solutions approach to co-creating adaptive case management systems jointly with end-users, developed in the context of the EcoKnow.org research project. The approach was tested in municipality of Syddjurs (Syddjurs Kommune) by conducting a service-design project, implementing an open source case manager tool and a new highlighter tool for mapping between textual specifications of regulations and the DCR notation.
