

Release 5.5

https://documentation.dcr.design/release_notes/release-5-5/

Portal

- [Process Fragments](#) - Beta (5975)
- From this release we will **only** display what is in your current selected organization in process listing in the portal (6090)
 - If you open a process from a link from another organization you will be prompted to change organization before you proceed (5562)
 - Ability to share categories with Organization so you can share a category with everyone within an organization (5744)
- Bugs Fixes:
 - Fixed: Social login for Microsoft not working (6404)
 - Fixed: Data events not importing fine in Portal Designer (103552)
 - Fixed: Aggressive/Lazy users are executing events twice in simulation (6460)
 - Fixed: Several UI issues after UI/UX update (103676)
 - Fixed: User experience pop-up is appearing over other pop-ups (6453)
 - Fixed: Error on opening form having special character executed in it during simulation (103426)
 - Fixed: Validation message is not correct while adding a common activity with id started with word 'Activity' (101312)

[DCR Forms](#)

- Improvements:
 - Created/modified date/by columns added in Subscription table (5724)
 - Display value is displayed in PDF in received email instead of internal value for choice field (102404)
- Bugs Fixes:
 - Fixed: Calendar in DateTime field is not opening up when browser locale is Danish (6431)
 - Fixed: There is a space in Datetime field when value is executed (6425)
 - Fixed: Date fields are not left aligned when layout is Vertical (6417)
 - Fixed: Invalid date is executed if we remove value from date field (6424)
 - Fixed: UI issues

SimIT

- Improvement:
 - Update SimIT for simulation log changes when fill the form (102785)
- Bugs Fixes:
 - Fixed: Issue with simulation when more than 2 public users join from SimIT (104926)

One highlights line : Break large processes into fragments

Two highlights line : Better handling online forms

Release Date : July 26, 2020

Demo release date : July 22, 2020
