

Engine as a service

<https://documentation.dcr.design/documentation/engine-as-a-service/>

DCR Solutions offers to leverage it's DCR engine in several ways:

- Process as a service - [DCR Active Repository](#)
- Engine as a service - see below
- Engine on premise - contact DCR Solutions for details

Engine as a Service offers the [API](#) defined in the engine as a RESTful service.

A simple version of the DCR semantics has been made available on [github](#)

Details about the implementation and examples will be added shortly.

Type: API documentation

Audience: Programmers
