Example DCR SOP

On [LinkedIn](#) we've explained how a covid-19 corona sop could look like (in Danish). You can view the [graph](#) here:

Please visit this graph for an example of a DCR SOP.

SOP modelling guidelines

Modelling a DCR SOP and DCR Forms you often end up using include/exclude pairs much more than in classical DCR processes. The 6.6 release of the DCR Portal introduce the new rule, the logical include, which combines include and exclude into one rule. The 6.6 release also introduces the value rule which enables one activity to set the value of another activity. The logical include and value rules are often used in DCR SOP modelling.
