

Set a deadline in WorkZone based on an activity deadline

<https://documentation.dcr.design/example/set-a-deadline-in-workzone-based-on-an-activity-deadline/>

This model explains how to set a deadline in WorkZone as a custom field.

The user first pick a deadline by entering in a form. Then the deadline is computed as the deadline date plus 1 day (P1D).

Finally, the deadline is set in WorkZone using the SetValue Effect.

Parameters

×

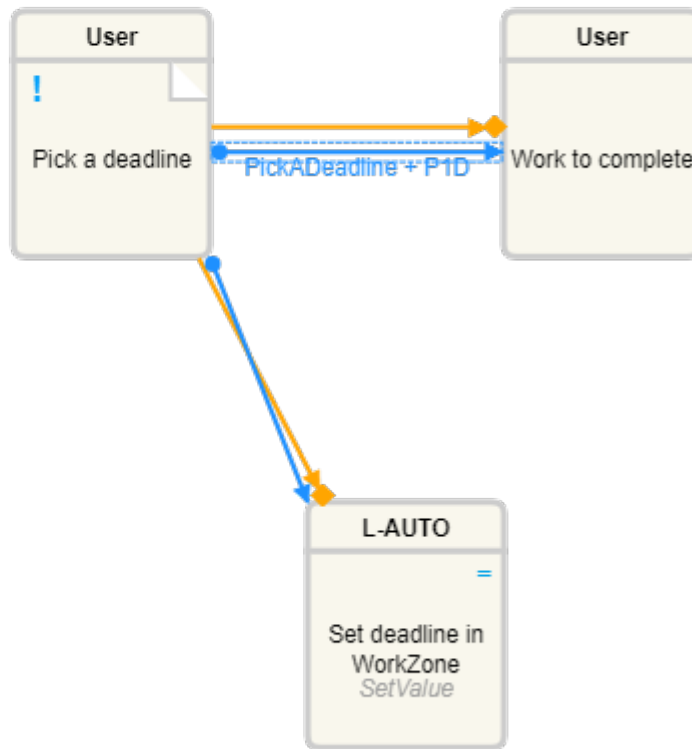

Id	Value	Required
Entity	Files	Yes
Filter	ID eq '{Case.ID}'	Yes
Property	Deadline	Yes
MaxEntitiesToUpdate	1	Yes

SAVE

SetValue uses the computation of the activity to find the value to set in WorkZone. The field "Deadline" will be updated with the value of the computation.
