

Release 4.9

https://documentation.dcr.design/release_notes/release-4-9/

Portal

- New Features:
 - Support for [View Type](#) for rules in DCR Whiteboard in order to show, dim or hide rules while viewing the process
- Improvements:
 - Process Engine upgraded to version 3.0 that has various improvements
 - DCR Simulator
 - Now shows the value of computational events while simulating in the log
 - Ability to go back in a running simulation re-introduced
 - Renew account > Support for Academic users in account renewal process
 - DCR Whiteboard
 - UI/UX improvement. Added 's' for sub-process in lower right corner
 - Delay and deadline expressions can now be durations or date/datetime
 - Renamed "Sequence editor" in DCR Whiteboard to "Activity Editor" with basic documentation and Advanced options. Available for easy editing of activity properties
- Bugs Fixes:
 - Fixed: Grouping type for parent activity is set to Default if no child activity exists
 - Fixed: DCR Publisher: Now show all scenarios should, rather than just scenarios that has `isAccepting checkbox = true`
 - Fixed: Title of collection is renaming wrongly on Dashboard
 - Fixed: created date/by and modified date/by is missing in export scenario
 - Fixed: Extra/wrong notification is receiving when simulation is started
 - Fixed: Mentions are not working in Activity Stream
 - Fixed: Duplicate users are showing in Invite User tab in Connections
 - Fixed: Null alias for users in simulation log
 - Fixed: Simulation type is updating wrong in Edit Simulation
 - Fixed: Edit simulation not working in Simulation History when description is Null

Engine

- Updated engine to version 3.0.3 for DCR Simulator
 - Durations can now be expressions, e.g. "DateActivity + P2D"
 - Duration expressions extended so we now support a specific time of day using the "@hh:mm" notation
 - Delay and deadlines can now be date/datetime and not just durations
 - Using [ISO 8601 durations](#) internally as representations of duration
 - "-" in activity id not allowed anymore - was not allowed in DCR Designer so no processes used this

Release Date : January 24, 2020
